

VHF-UHF DIGEST

1973
AUGUST

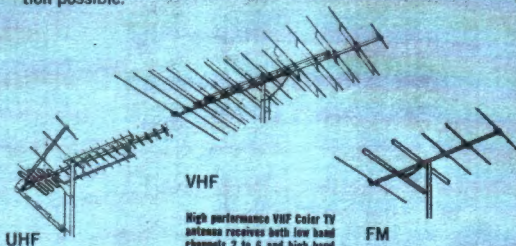

DEEP FRINGE AREA
MODEL 8282

Revolutionary 3 in 1 design electronically superimposes three antennas into one with very high efficiency for the finest reception possible.

WTFDA's
MARK LEWIS
VISITS DELHI

UHF

All channel VHF antenna receives UHF channels from 14 to 83. Its high performance will provide clear reception even in deep fringe areas.

VHF

High performance VHF Color TV antenna receives both low band channels 2 to 6 and high band channels 7 to 13. This type of antenna would be recommended for deep fringe areas.

FM

The FM yagi shown above will bring in stereo stations crystal clear even in deep fringe areas. Multi-path distortion will be effectively cut off.

publishers' notes...

WTFDA HEADQUARTERS, P.O. BOX 163, DEERFIELD, IL 60015 USA

THAT TIME AGAIN... About this time every year, there are four groups of people thinking about the 1973 WTFDA Convention... The first group is made up of DXers who couldn't be there, either because of the distance, expense or conflict. The second group is made up of people who didn't want to go, (poor misguided souls!). The third group went (and is probably enjoying the convention as you read this!). And now to the fourth group... The group of indecision... The largest group of all... And the odds are that you're a member of this group! You all know the symptoms... "Well, maybe I'll go"; "Hmmm, I'll have to give it some thought-- one of these days"; "I've never been to one of those things... Maybe I won't fit in" (worst excuse of all-- every DXer "fits in"); then there's finally the ever-popular, "Ah, maybe I'll make it next year". And "next year" the cycle usually continues. Next month we'll try to have a full photo report of the convention. I hope that it's convincing enough to be remembered "next year"!

AUTOMATIC TUNER CLEANERS... Several manufacturers are now marketing "automatic tuner cleaners" for strip type VHF TV tuners. The idea is clever, it seems to work, it's extra easy to install, but the price is insane! These cleaners or "tabs" consist of a small strip of porous foam rubber (the material is similar to that of artificial sponge and sometimes used as a packing material!), loaded with a "cleaner-lubricant". One side has an adhesive backing. The idea is this... one simply presses the strip onto the bottom inside of the tuner cover. As the channel selector is changed, the channel strip contacts rub against the lubricated foam. Thus the contacts are continuously cleaned and lubricated. Reportedly, the dirt and grit falls to the bottom of the cells. One manufacture claims that each tab should last over five years. Now to the price... In quantities of ten or more, the price averages 80 to 90¢ each! Furthermore, these manufacturers recommend that the TV service shops charge the customer \$4.95 for each tab with installation. It would be much cheaper to dig up some old packing foam and make your own tabs. One only needs to cut the foam to the shape of the cover bottom (usually about 3/4" x 2 1/2"), add some tuner cleaner/lube, install it and save \$4.95!

STATION BREAK ADS TO RETURN... For a limited time, we invite members to send their personal, non-commercial want ads, for free publication. Ads must be typed or printed clearly and not exceed 30 words. WTFDA reserves the right to reject or edit ads. Here's a chance to clear out your unused DXing gear or track down something you've been looking for. Send us your ad today!

STRANGE DX CONDITIONS... In spite of an early deadline this month, the report columns (especially FM) are loaded. High band Es, double hop Es and tropo ducting were all reported. There was, however, a strange early drop-off in the Es action. And just when things were getting hot. Any explanations???

BITS... Have some interesting news? Don't keep it to yourself. Send us the word! Personal items should go to Mailbox editor, Terry Colgan; TV to Don Ruland and FM to Bruce Elving. It's easy to clip an item out of your local paper and it may help someone log a new station!

by Mark Lewis

Recently, my travels took me to South-western Ontario and I had the pleasure of touring Delhi Metal Products Limited.

Of what significance is Delhi to DXers? Delhi manufactures an extraordinary line of consumer antennas which could be pitted against any of the major U.S. brands, and still come out ahead in terms of gain, Front-to-Back Ratios, and most of all, ruggedness.

Historically speaking, Delhi has been a familiar name to Canadians for more than a quarter century. The firm began manufacturing antennas in 1948. In that year, all television signals received in Canada were simply "DX". American border stations were the only available outlets, and those U.S. stations were operating with very low power. It was not until September 1952 that Canadian telecasts began in Montreal and Toronto. Hence, Delhi antennas, since their inception, have been engineered for erratic deep fringe signals.

Now to the Present: Delhi Metal Products manufactures a huge line of antennas and MATV products. They specialize in low-cost yagis peaked for special channel combinations i.e. 2-4-7 in Toronto (for Buffalo reception). Delhi also makes a superb line of "all-band" antennas.

The Receptron Series is Delhi's most popular "all-band" item. These antennas are unique in several respects: The forward elements classified as "Receptro Lens", perform both as highband and low-band-fm directors. The Model 1057 has 57 elements, yet it is only 179 inches long and weighs 18 pounds. The long rear reflector elements which are crucial for proper antenna performance, have a tendency in many cases to snap off under ice & wind load conditions. Delhi is the only manufacturer, to the best of my knowledge, to use rear elements reinforced with an extra roll of material. Experimentation with plastics have allowed Delhi to make claims that insulation hardware is "virtually unbreakable". I can attest to their claims --- plastic insulators on their antennas have weathered Toronto pollution and climate much better than Channel Master plastic. The stabilizing booms and mounting bars function well, without taking up too much mast space.

I suppose at this point I might address myself to the engineering programme carried out by Delhi. Edwin A. Adams heads the electronics development division. He is an innovator, as witness by his home-brew evaluation equipment. Range testing plays an important role in the development of his antennas. Towers, oscilators, transmitters, and of course antennas make up his test equipment. The storerooms at Delhi look like a DXer's garage, for there are antennas of each design and manufacturer. Adams painstakingly evaluates each antenna of his competitor, to find its strengths and weaknesses...hopefully weaknesses. He then concentrates on improving his own design through avoiding the pitfalls of others.

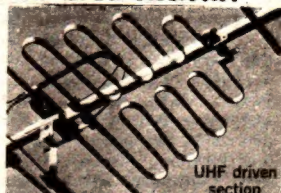

I believe the success of Mr. Adams' experimentation can be seen in my DX logs. I have been able to compare a large Channel Master antenna (of the 3600 series) against a Delhi 8282 (VHF-UHF combo)---the Delhi has been an easy winner despite the fact that it ran 35 feet more coax. There are distinct disadvantages to a VHF-UHF combo antenna: VHF gain is sacrificed, as is a large portion of the UHF performance. Nonetheless, my "combo" antenna yields 9.5 db gain on Ch.7, reaching 10.7 db on Ch.12. (that is, gain over 1/2 wave dipole). For the 1057, VHF-fm (only) antenna, I would expect about 2 db higher gain on highband VHF. The front-to-back ratios on the antenna are excellent. I have the test range curves for the VHF-UHF 8282, and the figures approach 30db on lowband VHF, and 25 db on highband VHF. (the 1057 has slightly better F/B figures) The VHF performance of my antenna has always been superb under DX conditions, and during "everyday" viewing....it far outshines the comparable Channel Master products.

My UHF installation was also made by Delhi. The people at DMP, take the familiar gold screen reflector of the Finco 7 foot dish, and make a major modification. The active feed element is replaced by four half-wave loops, parallel-fed on each side of the central boom.

This design yields 3 or 4 db higher gain across the entire UHF band, leaving you with approx. 25 db on the translator channels.

(the 3-4 db higher gain is compared to the conventional Finco 7' dish) The beam width of the modified Finco-Delhi is also much narrower than the conventional antenna. (less than 20 degrees at channel 35)

Previously, I had used a 6' Jerrold JUP-4 dish. In all honesty, the Jerrold afforded me good results....many of my trope records appeared in Hauser's stats. columns. The Jerrold was far superior to the 5' finco, in spite of the fact that the Finco 5' had more area in its reflector.

The Delhi 7 foot dish is unbelievably hot. My trope-scatter distance has extended out to 255 miles under "average" conditions. WBRE-28 Sorantem Pa @255 miles, is always there! Fringe stations, ie. WXXI -21 Rochester Ny. @ 100 miles is now usually watchable. WSEE-35 and WJET-24 Both Erie pa. @ 132 miles are more often viewable than previously.

The Delhi 7' dish is mounted in the same position as the Jerrold dish, and the .412 coax remains unchanged. As I have not recently tried an unmodified Finco antenna on this site, I may be over-rating the modified seven-footer. I did however, see the engineering comparison charts at the factory, and I am convinced of the technical improvement in the antenna design. The 3 or 4 db higher gain may seem insignificant but remember: that extra gain may help to offset the loss in your .412 or the insertion loss in your baluns.

Another point in favor of the Delhi dish: The hard-to-get channels, those channels adjacent to locals, pose no problems any longer. Trophe-scatter from WXON-20 Detroit (220 miles) is now received although CIOA ch.19 with 600 kw is located 10 miles away. The secret...the Delhi dish mulls out CIOA pointed at Detroit, 110 degrees west of the Toronto transmitter. I now, frequently receive audio and video from Ch.25 Saginaw despite OBLFT-25 220 kw at 10 miles!

I anticipate some comments from cynics: ie. what sort of receiver are you using? or what type of preamp do you have? My RX is an AGS Hudson, all tubes with the exception of the tuner (UHF) manufactured 2 1/2 years ago, it is not the hottest set on the market; RCA B&W 20" portables easily surpass my set. I have no preamp for UHF and we have 5 locals in the immediate area, 3 Toronto stations with a combined RF output of 884 kw, with Buffalo "locals" at 50 miles with combined RF of 2.2 million watts. The supreme test of my system will come Nov. 15/73 when Global TV Ch.22 Uxbridge @ 25 miles begins testing their 5 megawatt!!! xmtr I envisage overload problems at that time.

A tip for UHF DXers: Some CATV friends inform me that RG 59 U foam and RG-11U foam have a tendency to soak-in moisture despite their polyethylene coatings. In northern climates, this can be disastrous during the winter period when frozen moisture may exist within the foam. For that short run of coax between the UHF antenna balun and retor motor, use ordinary RG-59. I believe Viko is the maker of the RG-59 which has an internal foil shield, and stranded tin-coated shield over the dielectric. I have used this wire in my system. It is much more water resistant, and the aluminum foil makes it more durable. It exhibits no more loss than 59-foam coax in short runs.

In conclusion, Delhi makes what I consider to be, a superior line of antennas with the DXer in mind. The model 1057 sells for \$54.65 at a retail store (Electro Sonic) in Toronto. The entire 7' foot dish retails around \$70...but that price includes the duty shipped on the

AND IN THIS CORNER, MOTHER NATURE

I just experienced the sort of a day that shouldn't happen to your worst enemy. And with the VUD column deadline nearing, I thought I needed an idea.

The Weather Bureau called it a violent windstorm. That's like calling a 1000 mile UHF tropo haul "slightly improved conditions." Even for Cooper, Draeb, or Seybold. Some yahoo just must have fooled with Mother Nature.

It started like any other day....

The Saturday didn't start off all that bad. A nasty thunderstorm hit in the early morning, bringing much rain and 50 to 70 mile winds briefly. But the sun appeared soon, no damage was noted, and I was reasonably sure the predicted storm had passed.

Several hours later, a FM newscast mentioned that a squall line was approaching, due in about three hours. It was about 2:30 PM, so 5:30 was the target time. However, as is so common, some FM newscasts are as authentic as a \$3 bill. For one glance to the west revealed an almost unbelievable cloud pattern and build up, later reported to be over 55,000 feet. Obviously, the FM newscast was an oldie, taped several hours earlier.

It's about to storm....

I quickly gathered the kids into the house, explaining that -- due to my great weather experience -- I was certain it was about to storm.

I'd sat through storms carrying tornados and high winds twice, once while camping in Kansas (were tornados are common) and once while camping west of Milwaukee (where tornados are rare). Those storms -- and my fears -- couldn't compare to this. The house shook. Windows rattled. Strange noises. A giant kaleidoscope, ever changing. Objects smashed into the house; the 300 ohm shielded lead-in on my seldom-used FM antenna flapped in the wind and threatened to smash a ceiling-to-floor dining room window.

The wind is from

I ran like a fool from window to window trying to determine the wind direction so I could position the 7 foot UHF dish perpendicular to the gail. But all I saw through the multicolored, ever-darkening haze and driving rain were trees, gutters, garbage cans, etc, bouncing crazily. One tree bent to the south, another to the north, another was no longer there! That crazy, twisting wind, easily in excess of 75 MPH, flipped the guy wires on the Rohn tower like some giant snake. There was little tension; the guys did little good.

I wasn't worried about the 50' Rohn #25 tower, though, because it probably could withstand 100 MPH winds even without guys, thanks to its anchoring in a yard of cement and home made channel iron house bracket. As for my 25 feet of Heights aluminum tower guyed atop my 25 foot roof, well, if the guys on it had been loosened as those on the Rohn, I wouldn't bet even money it would stand. I wondered how the 7 foot dish with tower would sound through all the other noises as it crashed into my roof!

Dirty pool....

Even the midnight skies what appeared as the storm intensified didn't alter my fears because lightning struck almost continually to give me brief glimpses of the continuing damage. Soon all electrical power was off. The family huddled in fear as weird noises continued, some of them probably due to objects flying into the house. Mother Nature was playing billiards on my property ... and winning.

It lasted about an hour. Poking my head outside into a strange, calm drizzle, I saw a disgusting sight. Downed trees. Utility sheds crumpled like gum wrappers. Shingles, rain gutters, tree limbs, millions of bits of debris covered the area; you'd think the eighth race at Arlington had just ended.

I tiptoed through the debris on the lawn, turned, and viewed my own house. Several lost shingles. But the towers. Miraculously, the roof-mounted Heights tower with 7-foot dish was upright, barely, swaying like a badly battered fighter; guy wires, once tight, were now sagging. But it stood!

The Rohn tower -- not really needing guys except to reduce sway for climbers -- looked like a giant green thumb; tree limbs and leaves had snaked themselves throughout the rungs. One bay on the H-frame for the high-band quad array was bent.

The sagging guy wires on both towers helped like yesterday's newspaper. I could not imagine how the wires could loosen and stretch, how turnbuckles could back out. Only the "belt and suspenders" guying techniques such as shunt wires across turnbuckles and double eyebolts saved the Heights tower.

Damage was widespread....

In the aftermath, sirens blared for hours as downed trees, power lines, fires, and road blockages made life miserable. A few auto trips and newspaper accounts verified that we'd indeed had a strange "storm". (You see, we rarely have tornados in God's Country.) While damage was widespread, it was obvious that the winds here far exceeded the "official" weather bureau readings at the airport and that damage to the SW suburbs was indeed devastating. For example, a man was blown off a porch, hit head, rushed to hospital, and cashed in his chips the next day. Several roofs were torn from homes in a single path of individual destruction within a few hundred feet of my home. Water worshippers at our many local lakes had scurried for safety as the storm approached; most made it. A rare (one of seven), steel, antique trimotor aircraft had been pulled from its steel cable anchors, tossed 50 feet into the air, and dropped to earth as razor blades. Entire walls and siding of several new homes were ripped off and found blocks away. The WTMJ AM radio tower toppled. Electrical and phone service in some areas was out for up to six days.

Antennas were not spared....

So what does all this have to do with DXing? Nothing really. Except that as I observed the hoard of downed antennas and towers, I wondered how many of these would still be up had correct equipment been selected and proper installation done. Sure, some flimsey installations remained up luckily, perhaps due to the wide differences in wind velocities at various locations. But most bad installations came down; you know the kind: 2 to 3-foot tripods, unguyed, with cheap, thin, seamed metal masts mounting wind-catching, wedge-shaped all-channel antennas.

Now, home-owner's policies are nice. However, getting prompt action and 100% payment without a hassle is rare. I believe, therefore, that some basic "Commandments" are in order for anyone contemplating a new antenna system. These apply whether you do it yourself or have it done.

The thou shalt nots of antenna installation....

1. THOU SHALT NOT USE AN UNGUYED 2 OR 3-FOOT TRIPOD WITH A 10-FOOT MAST TO SUPPORT A HEAVY ANTENNA ARRAY AND ROTOR.
2. FOR LIGHT ARRAYS OR WITH WELL BUILT 8 OR 10-FOOT TRIPODS, THOU SHALT NOT DEPEND UPON SCREWS THROUGH THE TRIPOD LEGS AND ROOF TO HOLD. TO BE SURE, BOLT 2 x 4s OR 2 x 6s (construction grade) ACROSS A PAIR OF ROOF STUDS, THEN FASTEN THE TOWER LEGS TO THE BOARDS.
3. THOU SHALT NOT USE CHIMNEY BRACKETS, UNLESS CHIMNEY IS VERY STRONG AND BRACKETS WILL SERVE ONLY AS A TEMPORARY "THIRD HAND" FOR INITIAL SWING UP.
4. THOU SHALT NOT USE ALUMINUM SEAMED STEEL TUBING FOR ROTOR OR ANTENNA SUPPORT MASTS.
5. THOU SHALT NOT GUY TO TREES CHIMNEYS, OR FLUES.
6. THOU SHALT NOT USE THE GARBAGE CALLED ANTENNA ACCESSORIES SOLD AT PLACES LIKE ALLIED, RADIO SHACK, ETC. (YOU KNOW, THE OVERPRICED, FLIMSEY JUNK OFTEN MOUNTED ON PLASTIC ENCASED CARDBOARD AND LOCATED ON DISPLAY RACKS.)
7. THOU SHALT NOT UNDERESTIMATE THE FANTASTIC TORQUE WIND CAN IMPART ON TOWERS, MASTS, AND ANTENNAS.

The thou shalls....

1. THOU SHALL ALWAYS USE GUY WIRES FOR ALL ROTATABLE ANTENNAS, EXCEPT WITH A FREE-STANDING TOWER. USE THREE GUY WIRES AT ANY ONE POINT ALONG THE STRUCTURE FOR 3-LEGGED TRIPODS OR TOWERS, ALWAYS AT 120° ANGLES AND ALWAYS PULLING IN THE DIRECTION SHOWN IN THE SKETCH. USE FOUR GUYS AT ANY ONE POINT ALONG A STEEL MAST OR PIPE.
2. THOU SHALL USE 16 GAUGE (MINIMUM) HOT DIPPED GALVANIZED STEEL SEAMLESS MAST, WITH A 1.25 INCH MINIMUM OUTER DIAMETER. FOR PARABOLIC DISH ANTENNAS OR SIMILAR LARGE WIND CATCHERS, THICKER PIPE OR DOUBLE PIPE -- EVEN SOLID STEEL SHAFT INSIDE CONVENTIONAL TUBE -- IS A MUST.
3. THOU SHALL USE HEAVY DUTY GUY WIRE, MINIMUM OF 6-STRAND, #16 GAUGE, HOT DIPPED GALVANIZED STEEL.
4. THOU SHALL USE HEAVY DUTY TURNBUCKLES (SEARS CATALOG, FOR EXAMPLE) AND 0.25 INCH THICK (MINIMUM) EYEHOOKS.
5. THOU SHALL PERSONALLY VISIT LOCAL ELECTRONIC HOUSES AND INSIST ON SEEING THEIR ANTENNA ACCESSORIES. THEN, SELECT AND PATRONIZE ONLY THOSE HOUSES OFFERING THE BEST.
6. THOU SHALL USE TAPE GENEROUSLY TO TAPE SHIELDED TRANSMISSION LINES TO MASTS OR TOWER LEGS.
7. THOU SHALL SEAL ALL ELECTRICAL CONNECTIONS AND CRACKS ON BALUNS, COUPLERS, ETC. WITH SILICONE BATHTUB CAULK, GE 2561-71D OR EQUIVALENT.
8. THOU SHALL DRIVE EYEHOOKS FOR GUYING INTO ROOF STUDS, NOT JUST INTO ROOFING BOARDS.
9. FOR ALL ROTATABLE HEAVY ANTENNAS, THOU SHALL MOUNT ANTENNA ON THE MAST AS CLOSE TO THE ROTOR AS POSSIBLE TO REDUCE (1) ROTOR SIDE TORQUE AND (2) THE CHANCE OF MAST BENDING.
10. THOU SHALL PERIODICALLY INSPECT ANTENNA SYSTEM(S) AND REPAIR OR REPLACE ITEMS AS NECESSARY.

Mother Nature is an ornery hag. She never looses. But even in the severest weather, you can play for a tie if you follow the basic Commandments just listed.

Know your exact frequency

--Glenn Hauser

WE NORTH AMERICAN FM DXers have been spoiled by the overwhelmingly rigid frequency control required of our domestic stations--so much so that we tend to think in terms of discrete channels 200 kHz apart. However, when receiving any station outside the USA or Canada, we should not assume that it has to be on an 'odd' frequency, or has to be right on a nominal or listed 'split' frequency!

NW and SW DXers are accustomed to measuring frequencies of foreign stations, and so must we. However, different techniques are required on FM: for one thing, there are few, if any, receivers with backlashless calibration down to 10 kHz. Acquire a push-button odd-channel-only model only if you don't mind missing the best DX you may ever get (or as a second set).

The best way to pin down frequencies is to buy one of the many frequency counters now on the market. Some of them require adaptors to cover the FM range, or above 100 MHz, so check the catalogs and expect to spend \$250-\$300.

FORTUNATELY there's another, roundabout way that is almost as good provided four significant figures is accurate enough for you. It's an application of the same principle explained earlier with reference to video carrier injection and measuring UHF translator channels. Just use your well-calibrated general-coverage shortwave receiver. (What? You don't have one? You're missing the wider spectrum of DXing!) You can probably find a used Hammarlund, for instance, for considerably less than a new frequency counter. Then you can discover the merits of SW DXing during dull FM DX days.

You MUST know the IF frequency or frequencies of the radio. The manual should tell you, or you can find out by experimentation. You can practice on any domestic station on a known FM frequency. From here on an example will explain the technique best:

SAY you're hearing Radio Belize on approx. 91.3 MHz (go ahead: say it! No one will believe you, hi). Once you're over the shock and have started the tape recorder, warm up the SW receiver (or keep it warm and stable during openings). Tune Radio Belize as close to center channel as possible, but this is not too critical.

Then, starting at the highest frequency covered by the SW rx (preferably 31 MHz or so) tune down until a 'beat' from the SW rx blots out the FM. Depending on a number of factors, such as the strength of the FM DX and the amount of shielding on the receivers and antenna feed lines, the beat from the SW rx may or may not obliterate the FM DX. You can increase the strength of the SW signal injection, if necessary, by running a single wire with alligator clips between the two receivers' antenna terminals. Sometimes Radio Belize may be so strong that you have to wait until it is about to fade out.

ONCE BLOTTED, turn the FM volume up high and fine tune the SW rx carefully back and forth until you hear a 'swish' sound--similar to CGI between two FM stations. This means you're right on the correct frequency. Then it's simply a matter of reading off or interpolating the frequency to which the SW rx is tuned. This is a subject in itself; suffice to say that a crystal 100-kHz calibrator is very helpful, and a multi-vibrator down to 10 kHz intervals is even better.

YOU FIND, perhaps, that the SW frequency is 27.377 MHz. Then you add the SW rx's IF (or in some cases subtract, which you will know from previous trials). In my case it's 3.035 MHz. This gives 30.412 MHz. Then multiply by an appropriate integer, which should be obvious, in this case 3. This gives 91.236 MHz! There you have Radio Belize's hypothetical FM frequency.

DEPENDING on how carefully you do it, you may be safer rounding off the last digit, making this 91.24 MHz--unless you're certain of greater accuracy. All this may seem time-consuming and complicated, but with a little practice you can note the SW frequency swiftly and leave the arithmetic till later. You can even construct a conversion chart for the LA-prone 88-92 MHz band.

NEXT TIME you get Radio Belize, measure it again, as it may well have drifted in the interim.

FM ATLAS news: I am rushing to complete the second edition of the FM ATLAS AND STATION DIRECTORY before the 1973 WFDA convention, and will hope to have copies available there.

MEMBERS' REPORTS AND COMMENTS

William O. Dickerman, Williamsport PA, quotes from a letter he received from Neal K. McNaughton, chief, rules and standards, FCC: "...Station WGCR-FM Wellsboro PA is asking to change its channel assignment from 249A to 283 (104.5)," and it could increase power to 50 kw and improve FM reception in isolated areas of north central Pennsylvania. The letter then discussed at length FM translators and boosters and noted: "Translators and boosters are limited to one watt east of the Mississippi River because of the heavy concentration of regular FM stations as compared to the plains states and the West" (where they may be 10 watts). Bill reports both WPEZ 94.5 Pittsburgh and WVCD 97.9 using their correct call letters only on the hour; otherwise you hear only their respective AM stations' call letters mentioned (and frequently). "I have written to WVCD at least twice and to WPEZ once complaining about this practice," says Bill. Here, perhaps, is a chance for DXers to call to the FCC's attention a shortcoming in the new rule that allows only hourly identifications; it is manifestly misleading to listen to an FM station and hear only an AM station's call letters mentioned which are different from that of the companion FM station, save for only one legal identification on the hour. WSHH 99.7 Pittsburgh recently went MOR, \$. WMSP 94.9 Harrisburg was recently heard announcing as having 50,000. From the June WVIA program guide: "operations chief Roy Hoinowski and his crew report a smooth FM kickoff with 50,000 watt blanketing wide listening area from our fully automated radio studios." Actually they are only 5,000 watt ERP; 1250'; it seems to be common practice for PA stations to over-state their effective radiated powers. They may have coverage equal to 50 kw at 500', but that still does not make them 50 kw stations. WVIA-FM *89.9 is in Scranton PA. And WVCD is in Hazleton PA.

Bill Grant, Worcester MA, says that WCCM-FM 93.7 Lawrence MA announced that they would soon be \$, and they are announcing as using 50,000 watts; and he confirms that WFUZ 93.7 in Ocala FL is now \$ and MOR.

A lot of OK news recently came from an Atlas reader in that state. New \$ stations there include KWHW-FM 93.5 Altus, KKAJ 95.7 Ardmore, KWOE-FM 106.9 Clinton, KNED-FM 101.3 McAlester, KGOU 106.3 Norman (rock and classical), while KXXX 105.5 Chickasha plans to soon be \$. In MO, KRKG 104.9 Carthage and KOBC *91.1 Joplin are \$. KOBC is 50% religious and 50% easy listening, and will operate with the full 14,500 (170') when it returns to the air in September.

Glenn Hauser, Von Ormy TX, notes KIXY 94.7 San Angelo is \$, as is KRMH 103.7 San Marcos ("sure puts in a crummy signal here"). Also \$: KAMC 94.9 Arlington, KMFA *89.5 Austin, KDLC-FM 94.3 Del Rio. Glenn suspects that KTAL-FM 98.1 Texarkana is \$, but needs some tropo help to be able to tell for certain.

Additional recent contributors of 88 MHz candidates: R.N. Allen, Dyer, Hauser, Wood. In order to prevent a proliferation of records due to frequency variation, we propose lumping together all frequencies within each of 200 100-khz wide channels: e.g. 88.650-88.749 includes HRLP, measured on 88.66 at one time. Comments?

C. M. Stanbury II, Crystal Beach, Ontario, Canada: "Although FM sound broadcasting in this country is still several years away, the hottest electronic topic continues to be whether it will be UHF or the regular 88 to 108 mHz VHF allocation." Stan is speaking not of Canada, of course, but of Australia. I have a copy of the Australian Broadcasting Control Board's report, Frequency Modulation Broadcasting, in which the arguments for placement of FM broadcasting in what is left of the 88-108 mHz band (most of it is allocated to television) or giving FM 40 mHz of UHF spectrum space are advanced. The report makes the recommendation that FM stations operate in the band 520 to 560 mHz, and that this would give the Australian electronics industry an exclusive product, since its FM band would be different from that of any other nation in the world, and thereby keep out low-cost foreign imported radios and foreign-made transmitting gear. Former WFTDA member Don Voegelé, now living in Australia, has been trying to get the ABCB to reverse itself and give Australia FM service in the VHF band, even if it's only part of the 88-108 mHz band.

In Canadian news, the CRTC has denied an application by CHIN-FM Toronto to change from 100.7 to 107.1, because "it is not appropriate to allocate a new FM channel in the Toronto area until consideration of its FM policy is completed." Looking into the CRTC's list of definitions, they include the following as fitting the category "Music - General Interest" (which AM stations would presumably adhere to, according to their policy): pop, country, rhythm and blues and rock; easy listening, middle-of-the-road, mood; protest, satire, political and social comment; novelty compositions, and popular arrangements of classical music, jazz or folk songs. The category "Music - Traditional / Special Interest" (what FM stations would most likely have to program) includes: classical music, opera and operetta, musical theatre productions, traditional folk songs and dances usually of anonymous origin; religious music; jazz. The CRTC also informs me that the EHAAT of CKQN-FM "99.3 Baker Lake, N. W. T. is -50' (60 watts), and that CBO-FM 103.3 Ottawa is 1083' (70000 h, v). There is nothing definite concerning the move of any Canadian FM station to the new Canadian National tower: "The new communications tower is not yet complete in Toronto and I am informed contracts have not been finalized with the stations who have expressed interest in going on to that tower."

A design engineer with Delco Electronics, living in Kokomo IN, sent detailed information on stations having vertical polarization, including a cross-checking with the FM Atlas and phone inquiries of a number of stations. Newly-discovered stations with v: WXRT 93.1 Chicago, WDRQ 93.1 Detroit; WWJ-FM 97.1 Detroit; WBNS-FM 97.1 Columbus; WMZK 97.9 Detroit; WGCL 98.5 Cleveland; WFMK 99.1 East Lansing; WILL-FM *90.9 Urbana; WGUC *90.9 Cincinnati; WABX 99.5 Detroit; WLEN 103.9 Adrian MI; KNX-FM 93.1, KMET 94.7, KFSG 96.3 Los Angeles; KWIZ-FM 96.7 Santa Ana CA; KAGB 103.9 Inglewood CA; WYMO 98.3 Monroe MI; KOOL-FM 94.5 Phoenix. WIUC 98.3 Winchester IN is listed both s and v. He also supplied a list of FM stations broadcasting with a 67 kHz subcarrier (see May VUD, p. 16), consisting of the following stations not on John Ebeling's list:

WHME 92.5 Toledo, WVLC-FM 92.9 Lexington KY, WART 93.1 Chicago, WQFM 93.3 Milwaukee, WJFM 93.7 Grand Rapids MI, WXTA 94.3 Greencastle IN, WJCL 94.3 Elgin IL, WLRW 94.5 Champaign IL, WFBQ 94.7 Indianapolis, WFOL 94.9 Fairfield OH, WZUO-FM 95.7 Milwaukee, WPTM-FM 95.7 Piqua OH, WTVN-FM 96.3 Columbus, WLAV-FM 96.9 Grand Rapids MI, WNBH 97.1 Chicago, WISN-FM 97.3 Milwaukee, WHAS-FM 97.5 Louisville, WONS-FM 97.5 Champaign IL, WMZK 97.9 Detroit, WNCI 97.9 Columbus, WANG 98.5 Coldwater MI, WBSG 98.7 Detroit, WHIO-FM 99.1 Dayton, WIAI 99.1 Danville IL, WSMJ 99.5 Greenfield IN, WNIC-FM 100.3 Dearborn MI, WVTs 100.7 Terre Haute, WITL-FM 100.7 Lansing MI, WSBT-FM 101.5 South Bend IN, WVEN 101.9 Springfield IL, WGLE 102.7 Oak Park-Chicago IL, WSOY-FM 102.9 Decatur IL, WWRZ 102.9 Ann Arbor MI, WPOK-FM 103.1 Pontiac IL, WBYR 103.5 Chicago, WDBR 103.7 Springfield IL, K11K 103.7 Dayenport IA, WOJO 105.1 Evanston-Chicago, WUDE-FM 105.1 Cincinnati OH, WOOD-FM 105.7 Grand Rapids MI, WITO 105.7 Peoria IL, WXFV 105.9 Elmwood Park IL, WPDF 105.9 Middletown OH, WKHM-FM 106.1 Jackson MI, WYNO 106.1 Mansfield OH, WDRK 106.5 Greenville OH. WVCY 107.7 Milwaukee.

The U. S. Federal Communications Commission is looking for comments from the public and the broadcasting industry on program conformity that radio program syndication services force on individual stations. I believe that a lot of the impetus for stations giving their full legal identifications only on the hour and rounding their frequency to "FM 97," etc., comes from syndication services -- and is the sort of thing the FM DXer can now react to, with the FCC promising to at least listen. Muzak is anti-syndie, claiming that the services will not affiliate with FM stations (such as those above) having a 67 kHz subcarrier, alleging that modulation has to be cut to 90% on such stations. That's 73 for this month.

WQED
FM
STEREO

Radio made its international debut in Pittsburgh announcing the election of Warren Harding as President.

Forty-three years later, we witness the birth of WQED-FM. It is guided by the same Pittsburgh educational broadcaster who introduced the first community-owned television station in the world.

23,808 posters and flyers, as well as dozens of street corners, mail and department store announcements, have proclaimed the good news: a fine arts station on the Pittsburgh radio scene.

Primarily classical music will be heard from before dawn until midnight, seven days a week. Clearly a design calculated to inspire visions of our daily bread (Dashi).

A fine arts station can help stimulate and encourage the cultural vitality of a vibrant Pennsylvanian. Art affects us, affects the quality of our lives, and therefore the quality of life.

To reduce the art scene may not at first appear monumental. But a knowing, subtle, on its already have noted that this new opportunity may prove far more impressive than any of us dared hope.

NOTE: We propose hereafter to alternate scoreboard orders by station total and by "saturation" (Can anybody think of a better name for the latter?) Thanks to Anthony (ex-Joe) Markewicz for splitting his two Manitoba totals. Bruce Elving's figures do not conform to Statistics Guidelines; Richard Wood's do, although he disagrees with them extensively.

AURORA TVDX: Several times we have requested such data, but response has been extremely small. WHY? DXing Au TV audio should be no harder than FM, for which there are MANY Au records!! 73, Glenn

YOU CAN STAY WITH IT.
ALL SUMMER.

WESTERN FM DX

Jun 8: 1735, spotty Es 88.3 to 98.5, and agn at 1814. 1820 WQAY-FM 94.1 Oak Hill WV (1140 mi) local ad, vy spotty stuff... 1900 WVMC 88.9 Buckhannon WV (1210 mi) in, ex, mx.

In my short time at FM DXing, the Es performance in the June 3-6 period is the

best I've come across. With simultaneous openings to east and west coasts for several hours there was ample chance for many to get double-hop on FM. It sometimes got to the point where hearing all those extra stations in seemed normal! With a little more selectivity on the receiver (like an IPA) I wouldn't have to wait for the near local frequencies to get so strong. The 93.1 Es logging and a 92.7 one are rare for me with local 92.9, etc. Also, the June 5 short-skip into Louisiana with the implications of an MUF around 150 mhz was a new thing for me, having heard similar Es behavior on 50 mhz many times (i.e., Florida and Louisiana at the same time). Total station count is now past 400 with over 300 on Es in 37 states. 73.

(Ed. note-- a good job, Pat. Anytime one gets both coasts, Central America, and Canada in one 48 hour period, the opening has to be remarkable.)

Richard Noel Allen

Billings, Oklahoma 74630

(May 10 - June 12; All times CST)

This is my first report. Receiver is a Pioneer SX-300T. Antenna is a home-made 5 element yagi, approximately 20 feet.

The report not quite as wild as the prior one, but plenty of DX just the same. Station count approaching 500, with over 350 of them via Es. At Times during the June 25 opening into the Denver area some of the stations seemed to exhibit the multi-path distortion from mountains that was very evident in Boulder while I was there in 1971. 73.

is about to lose this DXer, who feels DX conditions are here; Final totals must await trickling tentatives, but in addition to those in the Statistics column (along with an appearance of my new address): of the 897 stations, 661 are by Es, 279 by tropo, 43 by MS, and 86 duplicated (15 stations duplicated twice, i.e. 3 propagations). 94 is the most productive, accounting for 105 stations; 102 Mhz, bothered by two locals, has only 12. Best Es states: FL-73, CA-62, OH/WI-46; overall: TX-123, FL-78, CA-62. As before, all DX below is by Es unless otherwise specified. More abbreviation key at the end. And now, before I head into DX semi-retirement(?), I have a few more loggings for you...

FEATURING FM DX FROM LOUISIANA TO MARYLAND

Bill Feidt, 8708 Contee Rd., Apt. 14, Laurel MD 20810

Greetings from a new member of the WTFDA. All FM DX here is done with a Sears rx and rabbit ears. Laurel is not the best of locations for FM DX, counting stns in Washington, Baltimore and Annapolis as locals, but every once in a while one sneaks through the din.

Does anyone have info on Cuban on 90.5? Often noted here during openings into FL. 73. (Welcome to the column, Bill, please report monthly and encourage other Marylanders to do the same. Cuban is Radio Rebelde, address Calle M 23 y 21, La Habana, call, though not used, many be CMW-FM. Or, you may report all Cuban stns to Instituto Cubano de Radiodifusión, L y 23, Vedado, La Habana; you should report in Spanish, no return postage enclosed. REW.)

NEW MEMBERS - HOW ABOUT SENDING YOUR FIRST REPORT?

Dr. Richard E. Wood, 820 Arlington Ave., Baton Rouge LA 70806. CDT.

Loggings this very productive E-skip month were boosted by altering my Winegard 11-el SC-650 FM antenna to vertical polarization; it is still at 25ft. on a Tenna-Rotor. Of course, my quad of four CM 9-els at 65 ft. remains. I believe that my logging of new state WY on 97.9 next to my 100 kW local on 98.1 was largely due to the vertical, which also produced better signals than the quad on some Mountain zone stations with vertical polarization. It receives very little signal from semi-local horizontally polarized stations. My states heard total leaped up to 38 plus DC this month. The last day of June brought my 38th., MA in a brief 15-min. opening confined to the educational band.

 Nx & wx at 1955.
 94.5 KWMT Fort Dodge IA 970 Es 6/29 2011-2026 In & out MoR mx, spots.

And that's it for this month. Some others noted on 6/29 opening (unneeded here) KSOZ MO 88.1; KMWU KS 89.1; WHWC WI 88.3 and a number of other WI stns on the educational band. It looked as though the afternoon and evening on 6/30 were good for DX. (Yes, cf. above, REW). We hosted the annual church picnic that day and TV was going wild but I had no chance to check FM. Will be spending our vacation at the cottage most of August, but that will probably be too late for FM skip. Veries in (all letters) - WPRM PR 98.5 25 kw; WHPC Garden City NY 90.3 390W; Veries now at 646 in 31 states, Ont., P.Q., Man. plus Bermuda, Cuba and Puerto Rico. 73, Hank.

 Correction: On p. 17 in June VUD, line 31, "WKLD" Clanton AL should read WEZZ. (Tx to BFE).

Thanks to all reporters for their support - Larry Vogt by special delivery letter when he heard the deadline had been moved forward. Please support the column as such active reporters do. As I have said before, it takes no fancy receiver or antenna to log skip. Some of the best skip loggings have been made on table model or car radios. So let's have a report from you. REW

Rx: Fisher 500TX. Ant: Finco FM4G at 25 ft. Times: EDT. New logs underlined.

June 13: 1634-1702 Es to Bermuda w/ ZBM 89.1 and ZFB 94.9 coming thru. \$ MoR Formats (850 mi.). 1759 Es to Florida began. Logged 14 new FL stns w/ help of FM Atlas & Station Directory. Don't know how I got along without it in the past. (Right, how many of you readers are still muddling through without its aid? REW) 1758 WHRS 91.7 Boynton Beach (840) ID; 1859 WLRN 91.3 Miami (910) end BBC interview pgm; 1801 WMCN 92.7 Stuart (810) local ads; 1805, 1815 WGYL 93.5 Vero Beach (780) WGYL News Capsule, ads; WJCT 89.9 Jacksonville (630) \$ CL, YL anncr; 1810 WRMF 98.3 Titusville (730) ad for Daytona Beach; 1815, 1825 WMOP or WFUZ 93.7 Ocala (710) ads, later editorial, sports. Tentative report sent to get correct call for the logs; 1821 WFAM 91.1 Jacksonville (630) discussion; 1823 WILD 94.3 Lake City (660) severe wx warning; 1824 WGNW 94.3 Riviera Beach (830) RR; 1805-1830 WYFL Jacksonville (630) mono EL. Strong, stable sigs compared to others; 1830 WALJ 93.5 Naples (900) nx; 1833 WKIZ 96.1 Jacksonville (630) nx; 1835 WUSF 89.7 Tampa (795) PSA; 1844 Cuba on 90.5 - sounded like Rebelde; 1858 WPCS 89.3 Pensacola (800) Freedom Talk #64 (Lifeline is heard daily 1845 LIT, REW). Only one from W. FL & had much fading; 2100 WHOO 96.5 Orlando (750) ad for camping sites - "write WHOO"; 2103 WQXM 97.9 Clearwater (800) ad Spectrum Electronics; 2104 WFOY 97.7 St. Augustine (650) wx, ads. FL stations then quickly faded out. Big surprise at 2115 when XHGL 97.7 Mérida, Yucatán (about 1500 mi.) came thru for country #6. They were heard until 2128 peaking "moderately strong", but w/ lots of fading. Heard ads for El Banco de Yucatán, Ron Potosí (ron de clima tropical), & cigarrillos. ID was "Contribución de XHGL frecuencia modulada a la comunidad, radio y televisión al servicio de México." (Congratulations, REW)

June 19: Trops to the north & another workout for me and my new FM Atlas. 8 new stns and too many relogs to mention. 2105-2132 WVIA 89.9 Scranton PA (210) folk mx-disc. pgm. Fairly weak; 2119-2205 WRHY 92.7 Starview PA (110) Prog. RR. Much fading but strong peaks from this 720 watt stn; 2228 CKPC 92.1 Brantford, Ont. (330) "Starlight Concert"; 2238, 2259 WPHD 103.3 Buffalo NY (290) w/ ads, ID; 2241 WWOL 104.1 Buffalo NY ad, jingle; 2300 WAKM 100.9 Bedford PA (120) ads; 2331-2337 CHSC 105.7 St. Catharines, Ont. (310), "mx. that's soft & easy"; 2207-0002 WQLN 91.3 Erie PA (270) \$ CL & s/off 0002.

June 20: And the tropics just keep on coming. 14 more new ones and no sleep tonight. (A worthy sacrifice, REW). 0016 WWSE 93.3 Jamestown NY (250), "Your old friend w/ a new name, WWSE, the happy sound in Jamestown"; 0017 CKQS 94.9 Oshawa, Ont. (350) MoR, ads; 0032 WAMD 105.9 Pittsburgh PA (175) black mx, WAMD jingles; 0030, 0130 CHIN 100.7 Toronto (340) RR, "Radio International"; "Payne till 4 am"; 0125-0131 CHUM 104.5 Toronto & Progressive RR; 0129 CKFM 99.9 Toronto & MoR; 0139 WROC 97.9 Rochester NY (295) \$ EL (24 hrs/d); 0148 WVOX 100.5 Rochester "no nonsense music for the adult majority, we don't kid around" (sounds kinda grim, REW); 0140-0200 CHFI 98.1 Toronto CL; 0201 WEZO 101.3 Rochester PSA on NY labor laws, write WEZO; 0202 WLAN 96.9 Lancaster PA (110) sign-off; 0207 WGRQ 96.9 Buffalo RR, jingles (typical "Q" format); 0213 WQWK 96.7 State College PA (140) promo a "quick" radio contest; and finally 0800 WCCS 101.7 Central City PA (150) nx. Signals quite strong from most of these. (Some nice Canadians there, REW).

June 29: Es started 1751 w/ ZBM 89.1 Bermuda in again. Also on 89.1 at that time was a \$ RR stn from the west. At 1758 WHA 88.7 Madison WI (690) was heard. This means that there was again (as on 5/28) the possibility of double-hop from the WI, IA & MN area to an Atlantic DX country. Others hrd were 1900, 2140 WCAL 89.3 Northfield MN (900) CL; 1854 KANU 91.5 Lawrence KS (960) "Kansas Editorial Review". They gave the call letters of other KS stns during this pgm - beware! 1931 CL // on 88.7 & 90.3 probably WHA & WHLA in WI; 1944-1957 KOCC 91.3 Sioux Center IA (1030) nx, bulletin board; 1955-2016 KHKE 88.1 Cedar Falls IA (830) mono folk-country-bluesgrass and nx at 1958. Very strong sigs have me wondering why I didn't hear them

Larry T. Vogt (Cont.)

before this. (Yes, I think this stn has made some changes - very potent here on Es, and cf. other reports herein. REW) 1959 WJJP 93.5 Joliet IL (590) ID; 2002-2012 KOEL 92.3 Delwin IA (800) \$ C&W, livestock ad, jingles. Much fading; 2009-2028 WACI 92.1 Freeport IL (685) oldies on "WACI Gold Weekend"; 2013 KCHF 93.5 Sioux Falls SD (1060) ad for Dakota Decorators. \$ on peaks; 2014-2023 KMMT 94.5 Ft. Dodge IA (910) ad, 2 IDs in a row. "94" and in \$ o/WRVQ Richmond; and 2016-2023 KESD 88.3 Brookings SD (1070) oldies, SD nx. Weak sigs and lotsa fades.

Totals now at 495 from 35 states and 6 countries. Veries only trickling in. Must be a lot of CEs on vacation - only about a 30% return so far this season. Lots of luck to all. 73.

Lowell E. McCown (K41TF), Box 416, Martin KY 41649

Es finally made its debut for 1973; though not in a big way. On the eve. of June 4 the first activity was noted from S. TX and NM. Here's how it went:

June 4, 1973 Es. EDT.

3:07 pm KELT 94.5 Harlingen TX (1175) ad "Palm Valley Estates"

5:00 pm KSIX- 93.9 Corpus Christi TX (1090) ID then fade-out

9:15 pm KBIM- 94.9 Roswell NM (1250) ad Stardust Supper Club (this is my
my most distant stn thus far)

9:42 pm KAUM 96.5 Houston TX (900) local jeweler spot. (this is the latest
I have heard Es).

No stns observed above 94.5 on the above opening.

On June 5 Es stns were heard from the S. TX area again. Nothing new, however. KELT was heard for the second time in as many days. This opening began at 9:30 am and lasted until 11:00 am. The stns were quite weak.

June 6 the band opened again to S. TX. This opening began 10:30 am and lasted until 1:00 pm EDT. KELT was in there again for the third consecutive day, something which has not happened before at this QTH. (I have never had 3 consecutive days of Es, HI.)

Here are my loggings for June 6; they are all new here:

10:33 am KLEF 94.5 Houston TX (900) promo for opera program

10:57 am KEEZ 97.3 San Antonio TX (1065) promo North San Antonio Times

11:05 am KINL 92.7 Eagle Pass TX (1190) just got their ID.

11:30 am KIXS 93.3 Killeen TX (960) local nx w/ Robert Adams (my best TX
stn., 760 watts). (Nice, REW).

11:47 am KOYE 92.7 Laredo TX (1190) spot Vicky Lynn Clothing.

11:48 am KWLW 93.9 San Angelo TX (1090) local nx/promo for ABC news

12:00-12:30 pm KSJT 97.5 San Angelo TX (1090) all Span. except 2 ann. abt
Houston Astros Baseball in EE.

12:43 pm KSEL- (Freq. is 93.7, REW) Lubbock TX (1095) Spot Rolling Stones.
Nothing heard over 97.5 on above opening.

No more Es observed until June 13 at which time I enjoyed a treat from S. Fla. Most of the signals were quite strong during the duration of the opening. This opening began at 6:35 pm EDT and ended at 7:35 pm. MUF was good to 106 MHz. Here's the way they came through:

6:35 pm WGYL 93.5 Vero Beach FL (700) spot Evelyn's on the Plaza.

6:37 pm WGMW 94.3 Riviera Beach FL (810) spot "The Tall Man's Shop"

7:00 pm WTMJ 93.1 Miami FL (830) "The fine arts stn. in Miami, WTMJ, w/
60,000 W of \$ power, broadcasting from Sailboat Bay".

7:15 pm WMCJ 92.7 Stuart FL (740) spot savings & loan co.

7:24 pm WRYZ 96.7 Jupiter FL Promo Father's Day.

7:35 pm WEDR 99.1 Miami FL (830) weather for S. FL.

7:30 pm WNCU 89.7 Miami FL (830) "This is WNCU FM, Miami FL, the radio voice
of the Miami Christian Univ."

7:35 pm WMYQ 96.3 Miami FL (830) spot for wine.

And so ended the good FL opening. Unable to ID stns above 99.1 due local QRM.

FM_South

AUGUST_1973

Lowell E. McGown (Cont.)

June 18, FL was heard again - very briefly.

3:37 pm EDT WFYN- 92.5 Key West FL (900) Detailed wx forecast. This is my Southern-most stn. heard.

And yet still more S. FL stns on June 24.

5:25 pm WBUS- 93.9 Miami Beach (830) nx.

5:30 pm WOCN- 94.9 Miami Beach (830) "It's 5:30 - time for more great mx from 'Ocean' - WOCN."

On June 27, the South broke through again w/ an excellent opening. The following states were heard: FL, LA, AL (my 34th. state), MS and TX. It was a good thing that the signals were very strong because I had interference from two sources - a severe local electrical storm, and some "handyman" had his power tool going which didn't help matters any. The MUF was at about 98 MHz. June 28.

6:00 pm WMEZ 94.1 Pensacola FL (560) spot Wrigleys gum.

6:45 pm WQUE 93.3 New Orleans LA (680) spot Ford wagons.

6:47 pm KRLY 93.7 Houston TX (900) spot Pepsi.

6:52 pm WKSJ 94.9 Mobile AL (560) spot Eastern Shore Auto Assn.

6:05 pm WWHI- 93.7 Biloxi MS (615) spot Gulf Nat'l Bank.

7:15 pm WAB8- 97.5 Mobile AL (560) Inv. to heard man speak Baptist Church.

7:30 pm KCAW- (Freq. is 93.3, REW) Port Arthur TX (870) ID "Serving the Golden Triangle 24 hrs. a day - This is KCAW AM-FM & P.A."

and finally...a long-awaited opening to the New England area materialized on June 29. NY (state #35) and two Maine stns. (both tentative, however) were logged. (ME would be #37 for me.) (What happened to #36? REW)

6:50 pm WLNG- 92.1 Sag Harbor NY (600) promo Lions Club exhibit & sale

7:20 pm WRKD- 93.5 Rockland ME (835) "Today in Sports Pgm", sponsored by McCarty's Drug Store, 606 Main St., Rockland... (Since I did not hear the call but heard Rockland, sent tentative)

7:15 pm WMEH- 90.9 Bangor ME "Will have sports & wx for the Pioneer Valley after this message", then PSA, fade-out. Since there was only 5 mins. between the above logging and this one... well, why not write and ask...(I'll have to call this one a long shot, hi.)

So it goes... This June was not as spectacular as last June, but it did offer some interesting stns for my log. I have a word of advice to those of you who report stns in San Antonio TX. You had better make sure you have complete address on it or it might be returned marked "insufficient address". In 20 years I have only had 2 reports returned to me because of incomplete address - Yes, both were in San Antonio. I have occasionally sent one to the wrong address, but I can understand that when one is returned. Rx: Heath AR-17. Ant: flded dipole made from 300 ohm twinlead. I call it my "Back Porch Special" because that's where it is. Martin is in E. KY nestled in a valley w/ 600-ft. hills on either side. Not near any large city. 73 & DX.

Ken Simon, 528 Pilgrim Rd., West Palm Beach FL 33405

It's been a while since I've sent an FM report. I just haven't been doing too much FM DXing...more like stumbling over skip...

Pinco reflector when it entered Canada. DXers might wish to install the modified UHF feed on their own Pinco dishes. There is a possibility Delhi might sell you the feed section alone. If anyone is interested in purchasing the "feed section" I would suggest that he write to EDWIN A. ADAMS, at Delhi Metal Products Limited, Delhi Ontario, Canada. If you were to mention the VHF-UHF Digest article, he might be able to aid you.

I do not believe Delhi markets their VHF antennas in the U.S. (they are now owned by General Instruments). They might sell to DXers, if the DXer were to pay shipping and duty charges (if any) into the U.S.

In addition to the products mentioned in this article, I can also recommend their FM antennas, a Delhi 6-element antenna powers my Heathkit AJ-15.

73's and good DX. *Mark L. Lewis*

"reporting" the news

FLASHY NAMES for TV newscasts can help identify DX stations. Aside from occasional ads (not program listings) in TV Guide and actual observation there seems to be no source for this information. I hope the following far-from-complete list current as of the past four months, will help YOU. --Glenn Hauser

Russ Brown
3274 South Lake Shore Dr.
St. Joseph, Mich. 49085

John Ebeling 9209 Vincent Avenue So. Bloomington, Minnesota 55431

June turned out to be an excellent month for Es here in the Minneapolis area with good openings on FM June 5, 6, 10, 25, 27 & 29, also had a few good days of Tr the mornings of the 9th and 22nd. Times are CST which I use the year around: June 6, Es KOCV 91.3 Odessa TX wx, ID @1100; 1130 KIXY 94.7 San Angelo rock; 1135 KLDG-FM Hobbs NM; XHTO 100.9 Cd. Juarez Chih. MOR \$ & had a 67 kHz mx sub-carrier, very strong & my 2nd Mexican.. last one was 12 long years ago; 1145 KTDB 89.7 Ramah NM nx by YL. June 9 WMKC 96.7 Oshkosh WI on tr @0615 w/MOR. June 10 Es KBBK-FM Boise ID @ 2100, rocker with a 67 kHz SCA signal; KID-FM 96.1 Idaho Falls..relog. June 22 tr WATW 95.9 Ashland WI @0545, variety mx & cheese commercial. June 25 Es 1200 KMCR 91.5 Phoenix relog w/new calls, WJCT-FM 89.9 Jacksonville FL @1200, 1201 WRAS 88.5 Atlanta GA 1201 relog, 1230 XHRL 98.1 Monterrey NL Stereo rock, funny....12 years between first 2 Mex. stations & 19 days between the 2nd & 3rd. 2210 tr WPRE-FM Prairie du Chien WI Brewers BB and s/off. June 27 Es WFMM 93.1 Baltimore MD @1800 semi-classical, 96.1 WKTZ-FM Jacksonville FL @1815 relog MOR, WYFL 89.1 @1818 pushing Univ. in Jacksonville, WJCT-FM classical @1820, 1835 WPGT 90.1 Roanoke Rapids VA w/MBS nx, 1845 WTAR-FM Norfolk VA, WQSM 98.1 Fayetteville NC @1900 w/nx, 1905 WQDR 94.7 Raleigh NC relog w/new calls, hard rock and Muzak SCA, 1915 WFOG 92.9 Suffolk VA MOR & Muzak SCA, 1925 WYFI-FM Norfolk VA gospel phone 623-6262, 1928 WCMS-FM Norfolk VA country; June 29 Es 1622 WWSC-FM Glens Falls NY nx & wx rain, 1648 WEAS-FM Savannah GA black, hard rock w/weak modulation at times, 1655 WAGC 90.7 Augusta GA classical/ID as voice of Augusta college, 1700 WTOG-FM Savannah rock, WJCL 96.5 MOR, 1701 WVNY 92.9 Burlington VT commercials for H.A. Monash Well Co. and auto parts outfit w/branches in New Salem, etc. Vermont becomes state #40 for me. (congratulations John, RB). 1902 WDSC-FM Dillon SC.

Bruce F. Elving Box 24 Adolph, Minnesota 55701

Skip has been good on just a very few productive days here; otherwise, its been a rather humdrum FM DX season. May 28 brought these nuggets from Texas: KLEF 94.5 and KPFT *90.1 to complete my Houston, save for 10-watters; KETX-FM 92.1 Livingston (full of "Lake Livingston" weather forecasts), and KNRO 106.9 in Conroe. The evening of June 5 was somewhat better with all these new to my log: KMRC-FM 96.7 Morgan City LA; KPAC-FM Port Arthur, KWIC Beaumont, KMFM 96.1, KQXT 101.9, KEXL 104.5 and KBUC-FM 107.5 to complete my San Antonio, KROB-FM 99.9 Robstown "K-Rob Country", KOYL-FM 97.9 Odessa, KOBS 104.5 (with the usual tinny audio on the music; verie signed by owner Charles Kobs), and KUT 90.7 Austin with jazz and later Spanish, all TX. The afternoon of June 6 was the best skip day. New ones received from TX: KGTN-FM on 96.7 in Georgetown, KOCV *91.3 Odessa, KTEP *88.5 El Paso (mono, but will go stereo when they begin higher power operation), KFMN 99.3 Abilene, KDJW-FM 94.1 Amarillo; KPAN-FM 106.3 Hereford, and the high point of the day -- hearing the mule-train sound effects to separte the different program elements on KMUL-FM 103.1 Muleshoe. From NM: KMTY 99.1 Clovis, KSNM 95.5 Santa Fe, KLEA 101.7 Lovington, and the low-powered KDEF-FM 94.1 Albuquerque. Also, KIUP-FM 100.5 Durango CO with \$MOR, KSNM-FM 93.7 Pocatello ID \$rock (myfirst from that state). Trops June 9 gave WISS-FM 102.3 Berlin with mono country mx and the new \$ station WCSG *91.3 Grand Rapids MI. Also picked up the new KABC 105.5 Cambridge MN with \$ and MOR and sports. June 16 skip: WWIL 97.3 Wilmington NC with soul and \$ and WKRY 93.5 Columbia SC (\$MOR). June 27 WLSE-FM 94.3 Wallace, WAAV 102.7 and WMPD-FM 100.9 both Wilmington and WMBI-FM (\$MOR) Morehead City, all NC. Also that evening: WYCS *91.5 "your station for education" Yorktown VA, WESC-FM on 92.5 in Greenville SC. and WWBD-FM 92.7 identifying as "Bamberg-Denmark" SC. KWGO on 99.5

FM NORTHAugust 1973

Bruce Elving, cont.

was received in Lubbock TX, now with \$(formerly heard identifying as "Abernathy"); KGNF-FM Amarillo TX heard on its new frequency, 97.9, instead of 93.1(not counted anew), and all the following with new call letters: WITC 96.9 Charleston SC(WCSC-FM); WPUZ 93.7 Ocala FL (WMOP-FM now with \$ and MOR); WING 92.5 Henderson NC (WHNC-FM; has mono country music); WNEZ 94.1 Pensacola FL (WPEX); KIKS-FM Killeen TX (KLEN-FM); WVBS-FM Burghaw NC (WPGF-FM); KDBH 97.7 Natchitoches LA (KNOC-FM); WIRN 107.1 Virginia MN (WHLB-FM). Total heard from the Duluth area on FM: 1185, of which 47 stations are new ones for 1973. 73.

Joseph Fela 150 Robert Place So. Plainfield, New Jersey 07080

Greetings, its been a while since I reported in. DX so far this year has been good on skip but very poor on tropes. The receiver is still a Lafayette LR-1500T. The antenna a JFD FM-10A on a rotor, of course. DX with all times ELT: 5-23 Es 1901 WUSF 89.7 FL going into 'All Things Considered, 1928 WHBS FL 91.7 w/wx(Palm Beach temp.) & promos, WMCU 89.7 FL w/religious. 6-13 Es 1744 WOON 94.9 w/'Ocean'ID, Food Fair ad, 1746 WQXK 92.1 'serving Greater Miami'..I assume this is ex-WHMS(right Joe, RB) 1749 WAIJ 93.5 FL w/Job Line PSA, 1801 WFLA 93.3 FL w/good mx, sounded automated, 1803 WMYQ 96.3 FL rockin' thru local WQXR, 1807 WVOG 99.9 FL w/community nx, 1809 WAIY 105.9 FL bombing local WHBI with old rock, "waxey" ID's (v/l sez they are directional, figure 8 N/S - also sez they were heard in Waterloo, Ont. at same time), 1831 WRYZ 96.7 FL w/nx, 1853 WGOV 92.9 GA with country music, poor modulation and hum on audio, 1859 WJAX 95.1 FL w/ID then NEC nx. 6-19minor trop so a few call changes noted ..2130 WENU 92.5 CT over-riding potent WIFL, seemed to have a jazz program 2135 WPDH 101.5 NY with country mx, apparently ex-progressive. 6-20 Spot-ty tropes againwith the only thing of interest being WPEL 96.5 PA over-riding WVDB at times. 6-27 A very big skip day. 1804 WIUN 91.3 IL w/ wx, 1825 KGLC 89.1 MO w/rock, 1830 WLCC 88.9 IL w/PSA about tornadoes, ID, then into "Conversation", 1840 KWKI 93.3 MO w/bulletin board then rock ..(?)they were c/w last time I heard them a few years ago)(they changed to soul two or three years ago Joe, RB), 1844 KCKN 94.1 KS w/many ads, jingle, c/w, 1849 KRES 104.7 MO w/"trading post" thing, 1856 WDBR 103.7 IL w/wx/rock, 1857 KPMV 107.9 AR w/black programming, mentioned St. Louis baseball, 1901 KSWT 107.7 w/K-Sweet ID, 1910 KSIK 92.1 w/rather long wx summary, 1915 KSYM 92.5 w/progressive, into ABC nx @ :15, 1959 KPFT 90.1 making it thru WRTI somehow, ending a 3 hour cl program from what I could make out, 2000 KOSU 91.7 OK ending 'Mr by Candlelight, ID mentioning 100,000 watts, 2009 KOOO 104.5 NE w/wx, K-triple O ID, c/w, 2101 KMWV 89.1 KS w/promos and ID. 6-29 another big Es day with MN & FL coming in at the same time at one point, 1734 WRAH 101.3 MN with rock and about five jingles in a row at one point, 1740 (approx)...a rather unusual stroke of good luck...local WPLJ 95.5 broke down for about 2 1/2 hrs with a skip opening going; someone on 95.5 right off the bat with ads for Wausau but did not hold and no IDs given, 1755 KXTR 96.5 MO w/"Drive Time Classics", 1803 WGEA 93.5 AL w/eyewittness nx (I wonder how they figured that), 1820 WGOV 92.9 GA again w/c-w, sounds amateurish even though it is(probably) automated, 1822 WSGF 95.5 GA w/"Pet Patrol"(only GA #2 here), 1825 WLOW 95.9 SC w/ads, WLOW calls given(that's SC #1), 1828 WTVY 95.5 w/WTVY Total News, 1836 WIRB 96.9 AL w/many ads, rock on the harder side(a little unusual for the South?), 2002 slight resurgence of opening briefly with KGRC 92.9 MO w/rock, ID, "Great River Country" slogan. 7-2 new WNUH 88.7 CT w/nx, progressive rock at 2200, 2225 WAFL 97.7 Milford DE w/c-w was added. 73 for now.

Harry Hayes 2 Henry St. Wilkes-Barre, Pennsylvania 18702

Although things started out slow in '73 FM cx are just beginning to get

Harry Hayes, cont.

exciting now. Today, June 13 as I write this the Es MUF was past 107.9 at 1800. First: 5-23 Es @1845 MUF to 99.9, WOMA 94.9 Tallahassee FL w/c&w, tent. KWFC 97.3 MO @1930. 6-9 tr(following DX from Thornhurst PA) 0644 WECN 105.9 Hartford CT, WEZV 95.1 noted all day & days following w/very potent signal f/Bethlehem PA, stn. is inaudible in W-B. 6-13 Es, tuned in TV @1700 and MUF kept going up and down every few minutes, 1805 WYRL 102.3 Melbourne FL w/c&w/MBS nx, potent signal; 1809 WVOG 99.9 Boca Raton FL; WFTL 106.7 Ft. Lauderdale w/nx; 1816 WIRK 107.9 W. Palm Beach FL w/rock then into nx; this is as high as I've seen the MUF, beating 107.7 1832 WLOQ 103.1 Winter Park FL "51 minutes of music every hour", 1841 WQIK 99.1 Jacksonville, this station was in for a full half hour or more w/very potent signal, when I tuned in the announcer mentioned a Pete Mainard receiving the station in Brookville VT; 1900 WHEW 101.9 Ft. Meyers; unid 94.9 w/HP WLCY?(that's their format, RB); 1907 WPKE 104.1 Cocoa Beach v/very potent signal w/AM's WRKT calls used. FM total this time 147 heard, 1 prospective verie from WQIK. 73.

William O. Dickerman YMCA Williamsport, Pennsylvania 17701

6-22 WSHH 99.7 @0429 "wiah, allmusic, all the time"; 0534 WSEA 103.3 York PA; 0644 WEDO Owego NY 101.7; 0716 WGAL 101.3 w/a special wx report f/the national wx service; finally @0744 I logged WEZV 95.1 Bethlehem w/"EZ radio wx". 6-26 WDUQ 90.5 Pittsburgh heard @2158 w/nx/wx, s/off @ 2205. This brought my FM station total on my Zenith R7000y-1 here to 93 heard since 2-17-71.

Russ Brown 3274 South Lake Shore Drive St. Joseph, Michigan 49085

DXing time here has been rather limited in the past month, tropo is finally on the upswing after the long drought starting last Dec. 6-25 tropo SSW w/Memphis-Little Rock strong in the 500-600 mi. range, KMPL 97.7 Sikeston MO w/c&w @2345 "FM 97", WTAO 104.9 Murphysboro IL prog. rock all evening. 6-27 Es WDUV 103.3 Bradenton FL \$nx @1759, 1945 WGLF 104.1 Tallahassee FL wx, jingle &\$MOR, WYFI 99.7 Norfolk VA gospel @1900, WVEC 101.3 Hampton VA \$MOR @1905, WGH-FM 97.3 Newport News \$MOR @1915, WTAR 95.7 @1930. 6-29 Es Bermuda f/1700-1945, WJLK 94.3 Asbury Park NJ @1724 w/race results, 1729 WOBM 92.7 Tom's River NJ local spot...to be continued next time. 73.

August 1973

Next Deadline: August 12, 1973

FOR TELEVISION DXERS IN WI, IL, IN, MI, and OH. SUPPORT YOUR COLUMN AND YOUR CLUB

This will be a short column because of deadline restrictions in Chicago...next month should reflect a couple of good tropo openings which will be partially detailed this month. My apologies to topDXer Bill Draeb for not including his report last month. I've been up against a number of professional and personal deadlines for the last few months. I can't promise that things will improve, but will try to keep the column cooking.

E-skip activity has really dropped off since late June. The first report this month reflects again the very active Es in late May and early June. Tropo...quite dormant here until this past week...will surface in the second report. Again...I hope a number of you write in the next month or two so we can pin-point activity during late June and early July. Report # 1 follows.....

On June 6th, there were as many unids as I
 from Texas to Alberta. At one point during
 the evening, I had the Expos and Braves on
 all five low band channels at the same time
 (making IDs very difficult). Had 17
 days of Es through June 8. Can't remember
 the last time that happened. Log in Kewau
 now stands at 507! (Congratulations on 500
 plus stations Bill. Cooper is still chasing
 you...but I wouldn't look back! The many
 additional stations is really amazing, with
 your high total!)

Much Es for awhile, then dead. Much tropo to Canada. I'm learning Canadian anthem very quickly. Wife is positive of my insanity...I break into "Oh Canada" during dinner, etc. On 7-8, tropo was very weak...very narrow duct apparently. No signals were very good. Had WHYN-40 in and out through WICZ-40 TP, with ABC programming. WSMW-27 had lovely ad for records with local ID. DXers should thank "K-Tel" and other cheapo record outfits for occasional IDs! Thanks all for now. Peace. 73. Rog.

Topeka, Kansas 66604

I won't try to analyze DX sent in this month since there is so much and I won't be able to begin to get all of it typed because of various reasons. If you have sent in a report and don't see it published, wait until next month.

Log totals: TV 124, FM 199. DX is pretty good here with 12 new FM and 3 new on the tube. KTVK 3 and KVOA-4 are possibly by backscatter; both were in for a short time. Openings of May 26 and June 3,4,5 were excellent. Best of DX.

Not as much this report as last time, but still plenty. Have now passed the 200 count in stations and on the verge of 100 of them via Es. I've missed a lot of Ch 4, 5, 6 ID's that would have been new while my attention was with FM band. Some of the very late-running openings have been nice when locals 4 and 5 go off (ironically, many times it seems Es has picked Friday nights to do that and NBC runs 90 mins longer then. 73.

Glenn Hauser, Box 300, Von Ormy, Texas 78073

(8 June - 1 July)

(CST)

Lots of Es here, but nothing new; the MUF frequently reached FM, which receives priority. Apologies for omitting distances, but they've all appeared in my previous reports.

Best of DX to all

Dennis

V A F I (A recap of what it means and how it's used.)

Video (V)	Audio (A)	Fading (F)	Interference (I)
No signal 0	No signal 0	Auroral flutter 0	Loss of signal 0
Just detectable 1	Just detectable 1	Deep to fast 1	Extreme 1
Heavy snow 2	Poor 2	Slow deep 2	Heavy 2
Moderate snow 3	Fair 3	Moderate 3	Moderate 3
Light snow 4	Good 4	Light 4	Light 4
Snow free 5	Excellent 5	None 5	None 5

VAFI is a system for detailed reporting of signal quality in a minimum of space. A typical DX column VAFI report would be similar to the following: 4334N540. The first four numbers read directly off the chart above. "N" indicates the station is a new logging. "R" for relog and "T" for tentative are alternates. The last numbers indicate mileage from DXer to DX station.

C.C.I. FM [UNIDENTIFIED-DX]

Bruce Rummel
Box 103
Mertztown PA 19539

AUGUST 1973

A sudden flurry of unidentified FM DX has been logged, practically all sporadic-E (Es, or skip). If when you look over the reports below you think, "Well...that's got to be K***" don't keep it a secret. Let the DXer or this editor (note new address above) know. If you cannot immediately identify a station, place an 'x' in the item hyphens for reference later. PTA means probable target area, although any station from 700 to 1500 miles is considered probable by Es. Pencils ready?

Dr. Richard Wood, Department of Foreign Languages, Louisiana State University,
Baton Rouge LA 70803

Mon 04 Jun Es 1458 EDT 95.9 - - News item from VA. Perhaps WISZ Glen Burnie MD (or WYII Williamsport MD, which is stereo. Lacks data for ID; see Dyer's KCUE below)

1520 EDT 92.7 - - Twentieth Century Reformation Hour, with Dr. Carl McIntyre. PTA: WESM Prince Frederick MD or VA area.

1335 CDT 104.7 - - Mutual Progressive Network news. PTA: Northern midwest, PA, OH. Big-city black-populated area or campus town. KRES Moberly MO not suspected but is MBS. (Rock stations in PTA are in Dayton and Toledo OH, and low-power Fulton NY)

1435 EDT

1727 EDT 96.9 - - PSA in Spanish, into rock music. WFPG Atlantic City suspected. (NOT WFPG. Maybe WGRQ Buffalo, or WOUR Utica, both rock, but neither carries Spanish to my knowledge).

Dr. Bruce Elving, Box 24, Adolph MN 55701

Wed 06 Jun Es 1330 CDT 93.5 - - Double hop Es to California, small-town station with California wire service copy news. Steady but weak to about 1400 CDT. Four Californians suspect. (KKOP suspected here; other three are bigger stations farther north).

Glenn Hauser, 1312 West Oak Avenue, Enid OK 73701 NOTE: All loggings at Von Ormy TX.

Tue 22 May Tr 0106 CST 99.1 - - Stereo soul, 'self-expression time', mentioned Stone Street Park. PTA: WPMP Pascagoula MS. WQIK possible propagationally but cannot locate such a park in Jacksonville. (How about WEDR?)

Wed 23 May Es 1239 CST 90.5 - - Instructional pgm on French dances, 1246 end 'French for Six' into next program 'Music Is' without ID. PTA: OH, PA area. (NOT WDUQ)

1249 CST 88.7 - - Interview on stage lighting, mention Bell River (HS?), and Essex County (NJ). WRRH suspected but report not answered.

1641 CST 95.3 - - "West of Wentworth between Kennan & Wilson" sts? Stereo EL. PTA: ON-OH-MI area. CKDS heard earlier and may be same (Prob. CKDS)

1707 CST 106.3 - - Thornewood Thunderbirds track coach on panel; ment. 'south-suburban'; A&W ad; PTA: MI-WI-IL-IN-OH area.

1827 CST 98.1 - - Ad for Nashland, during local news. PTA: MI & area.

Thu 24 May Es 1020 CST 90.5 - - ABA PSA; local PSA on Screen ___ Film Society. PTA: SE USA; WVUM?

Fri 25 May Es 2312 CST 89.1 - - Hard rock, PTA: S. CA area: KUOR?

Sat 26 May Es 1400 CST 93.3 - - Aesthenia Gravis PSA; Del-O (IGM automation); maybe two stations. PTA: S, Cent. CA; AZ.

1411 CST 97.9 - - Giants-Expos BB; PTA: Cent. CA. KMJ?

1529 CST 93.5 - - Meade County weather. (DEFN: WMWG Brandenburg KY)

1603 CST 90.1 - - Bookbeat. PTA: SE USA: WABE?

AUGUST 1973

Glenn Hauser (continued)

Sun 03 Jun Es 1140 CST 91.1 - - Discuss police; PTA: CA.
 1142 CST 90.1 - - Classical music; PTA: CA.
 1158 CST 107.1 - - German language; PTA: S. CA; KMAX?
 1233 CST 101.3 - - BB from Pittsburgh; PTA: OH area. (WNCO?)
 1247 CST 95.5 - - Remote from Castleton, Ellisonville Road.
 PTA: IN but unable to locate place.
 1307 CST 93.9 - - Ad for Keystone, taken to be a town. PTA: IN, WV.
 Mon 04 Jun Es 1246 CST 94.1 - - Army Hour. PTA: VA area.
 1315 CST 105.9 - - 'Mid-South's choice for beautiful music', ad at
 Main & Union. WLAC? (Prob. WLAC)
 Tue 05 Jun Ms 1134 CST 90.5 - - Livestock report; antenna E; PTA: E USA.
 Es 1404 CST 100.1 - - 'The good side of music', PTA: GA, AL.
 1810 CST 106.5 - - Tom Allen DJ, may be automted. PTA: MI area.
 1823 CST 107.1 - - Baseball with inadvertent KNUJ New Ulm MN ID.
 1835 CST 107.3 - - White Sox BB. PTA: IL area.
 1837 CST 105.5 - - John Deere ad for Cambridge; PTA: MI-IL area.
 1910 CST 107.1 - - "...Music Hall" PTA: MI-WI-MI area.
 2055 CST 104.1 - - Cincinnati/NY baseball; PTA: OH-KY-IN.
 Tue 12 Jun Es 1918 CST 94.7 - - Classical music; seems NW. PTA: KBVL Boulder CO.
 2030 CST 89.1 - - Soul; PTA: CA. KUOR?
 Wed 13 Jun Es 1005 CST 106.3 - - Remote from animal show mention Walton or Washing-
 ton county agent. Both cys. in FL, GA but no FM's
 nearby.
 Sat 16 Jun Es 1135 CST 106.3 - - 'Solid Gold'; CDT zone; PTA: MN-IA-WI.
 2035 CST 99.9 - - NY/San Diego baseball. PTA: S CA.
 Mon 18 Jun Es 1030 CST 88.1 - - 'Our FM concert' PTA: WI-MN-IA.
 1329 CST 88.9 - - End 'Folk Music and Bernstein (sic)'; PTA: IA to FL.
 1414 CST 98.9 - - Temp 500; ID like KPRI, into gospel music 'in the
 twin forks' (Duluth?)
 Sun 24 Jun Es 1940 CST 92.3 - - ABC Issues & Answers; PTA: MI-WI-IL area.
 93.3 - - Same as above; therefore parallel delayed.

Mr. Pat Dyer, 5315 Silvertip Drive, San Antonio TX 78228

Wed 23 May Es 1128 CST 88.3 - - Part of full college course sponsored by prom-
 inent MA university consortium, Dr. Phillip,
 lecturer. Suspect KESD, WIAA, WHWC.
 1245 CST 90.5 - - Drama (OH, PA area). (NOT WDUQ. WKAR, WCBE
 suspected).
 1629 CST 90.9 - - End ABC news, then 'All Things Considered'. PTA:
 OH, PA. (Not WUHY. Seems CDT, WAUS, KHKE poss.)
 1710 CST 99.3 - - FM 99, ad for Ace Hardware. PTA: MI-OH.
 1843 CST 94.7 - - TV ch. 5 promo (OH-MI). (No direct affiliates)
 Sat 26 May Es 1127 CST 88.3 - - Opera. PTA: Great Lakes to Central US.
 1525 CST 99.3 - - Drug abuse discussion. PTA: OH-KY.
 1528 CST 95.3 - - Soul format PTA: OH-KY. (Prob. WHHT-FM)
 1537 CST 94.3 - - Columbia School of Broadcasting spot with
 721-0066 given. PTA: OH-KY.
 1646 CST 88.1 - - Jazz. PTA: SC-GA.
 95.3 - - Religious revival (Prob. WSOR)
 95.1 - - Ad for West Chevy
 1655 CST 94.1 - - Country & western music.
 Mon 28 May Es 1745 CST 88.9 - - EL with ID like WIFR. PTA: SC, GA (WYFL?)
 Sun 03 Jun Es 1129 CST 94.3 - - Ad for travel agency in Encino - KVFM? (Try KDEF
 Albuquerque)
 99.1 - - Spanish. PTA: CA. Maybe XHRM 99.3.
 1133 CST 94.9 - - EL. PTA: S CA, AZ.
 89.5 - - Opera (same).
 1150 CST 96.5 - - Ad for Mario's at 2604 5th avenue, not Phoenix.
 (Maybe KYYI)
 92.5 - - Auto race.
 98.7 - - Fernbrook-Glendale condominium ad, maybe KTAR-
 (or KJOI, both large Glendale suburbs)
 94.7 - - Auto race. WBSF suspected, did not verify.
 (Try KMLT)

Unidentified TV DX

AUGUST 1973

Ron LeBlanc, 2524 Arizona Drive, Marrero, Louisiana 70072

Wed Feb 7 Es ch 5 1720 CST - - Spanish; ID slide at right: with "La Imagen Agosto" at the bottom of the slide. Chief suspect is XHGC-5 as the "5" style matches.

canal **8**

5 1725 CST - - Spanish, slide at right PTA of this and previous is Mexico City area, and chief suspect is XHZ-5 (net 8)

Fri Feb 9 Es ch 5 1650 MST --- PBS "Sesame Street" Defn KNME.

5 1714 MST --- "Dragnet" Definitely KSL.

2 1733 MST - - local news with the words: " [2] News" at the bottom of the screen. Chief suspect is KOAI-2 Flagstaff, Arizona.

3 1805 MST --- "What's My Line" Definitely KTVK-3.

2 1927 CST - - Mexican station with the logo style shown at right. Suspects are XEPM, XHFA, XHCH, XHI, XHIA.

Wed Feb 7 Es ch 5 1835 CST - - Spanish educational station showing "Sesame Street" in color with Spanish audio. PTA: Mexico A channel 5 station relaying the XEI-PN Canal 11 net is suspect, though April Tele-Guia does not list the program. Oaxaca??

Mon Feb 19 Es ch 5 1238 CST - - Spanish educational programming w/ show about anatomy and another about electricity. This is probably not the Canal 11 net, but may be XHGC-5 running instructional programs or the XHGC relay in Las Lajas, XHAJ.

Richard Peary, 216 Acadia Circle, Fairfield, Alabama 35064

Wed Feb 7 Es ch 2 1630 CST - - Soap opera, and an XEW radio promo XEW-TV Mexico City likely, as it was running "telenovelas" at the time. According to April Tele-Guia, at 1600 "Esmeralda," 1700 "Cartas Sin Destino" and 1800 "La Rival."

2 " " " - - A panel/game show seen after the soap operas (I assume about 1700, LJP) and depending on whether XEW schedule was the same in Feb as April (telenovelas from 1600-1900) another station may be possible here.

3 1630 CST - - Canal 2 net soap opera. Suspect XEZ.

4 1630 CST - - Canal 2 net soap opera. Suspect XHD.

4 1640 CST - - Mexico: Spanish documentary, later a program with elementary school kids demonstrating soccer game.

Les Prus, 1615 Pierre, Manhattan, Kansas 66502 Best of DX, Les

Wed May 23 Es ch 5 1625 EDT - - local movie starring Eleanor Donahue. Saw marriage ceremony and driving off to Hawaii for honeymoon. PTA: NE US

SERVING THE
VHF-UHF DX
ENTHUSIAST

P. O. BOX 163
DEERFIELD, ILLINOIS 60015

The VHF-UHF DIGEST is the monthly publication of the Worldwide TV-FM DX Association. WTFDA is a nonprofit organization and a member club in the Association of North American Radio Clubs.

Dues: US and Canada: \$7 third class mail and \$9 first class, per year. Overseas: \$8 per year.

VUD Back Issues Available:

(1973) May, June

All back issues are 75¢ each, by special 4th class or 1st class.

|||||SUPPLIES|||||

FM Atlas and Station Directory: \$2.50 3rd class, \$3 1st class. By Dr. Bruce F. Elving, WTFDA FCC FM column editor. Very detailed, and probably the most accurate FM listing available. Offset printed.

Stationery: Features official WTFDA emblem printed in blue. Ideal for all your correspondence. 45 sheets: \$1.

Log Sheets: Perfect for keeping your running log neat and organized. Punched for a three ring binder. Pad of 100: \$2.

VUD Boxes: A great way to keep your copies of the VHF-UHF DIGEST neat and protected. Very attractive and a bargain at \$1.25!

Station Report Forms: For requesting QSL's. 45 sheets: \$1.

DX Column Report Forms: For reporting to columns. Free w/ SASE

All persons contributing their efforts for the Worldwide TV-FM DX Association, including editors, writers, artists, reporters and board members do so without any monetary compensation. Dues and all other revenue cover printing, postage and other expenses.

The WTFDA is governed by a five man board of directors. Board members are Dave Janowiak, Bruce Elving, Ferdinand Dombrowski, Gary Olson and Morrie Goldman. VUD Editor: Morrie Goldman; Publishers: Gary Olson & Morrie Goldman; Comptroller: Gary Olson; Bookkeeper: Bruce Elving; Sample & Supply Processing: Dave Janowiak
